FORREST TECHNICAL COATINGS

EXTERIOR POWDER COATINGS

A More Flexible Alternative for Consistent, High-Quality Finishes

Powder coaters today need more flexibility, faster turnaround, and the ability to handle custom work without constraints.

That's where Forest comes in.

How Forrest Helps You Stay Ahead

- **Keep Production Moving**
  Shorter, more reliable lead times help you stay on schedule and avoid bottlenecks. Our powders are designed for smooth application with excellent flow and leveling to reduce variability on the line.
- **More Flexibility Where It Matters**
  Lower minimums on custom colors allow you to take on a wider range of jobs without overcommitting inventory. Fast color matching and responsive support help you move quickly.
- **Finish Options That Win More Work**
  From standard colors to metallics, veins, textures, and crinkle effects, Forrest gives you the ability to meet customer specs and differentiate your work.
- **Performance You Can Rely On**
  Our exterior powder systems deliver strong adhesion, high impact resistance, and long-term durability in demanding environments.
- **More Than Just Powder**
  In addition to powder coatings, Forrest offers liquid and aerosol coatings, along with high temperature systems. This allows you to work with a single supplier across multiple applications.
