INTRODUCING

FIRESLUG SLASH BURNER

A fire starter designed for worker safety and reduced environmental impact

Newly available to the forestry and agricultural industries, FireSlug is a non-toxic fire starter. Flammable material is contained within an ignitable 12" plastic sheath (blivet) and can be safely handled. Blivets are packaged in a 6-gallon bucket with an easy-open lid for easy transport and storage.

- Alternative to combustible fuels
- 12” gelled blivets reach peak temp (400 °F) in 15 minutes
- Easy-open resealable pail
- Will burn wet or dry wood piles in wet or dry conditions
- Use 1-2 gelled blivets in place of typical lighting methods
- Ignites with lighter or torch
- Approved ground ignition product - US Forest Service testing facility Missoula, MT
